Why are you no longer in network with my current vision plan?

Unfortunately, we are unable to negotiate fair & reasonable compensation from some vision plans for our products & services. The reimbursements we receive from some vision plans have not increased (and in many cases have gone down) over the last 10 years. Imagine not getting a pay raise for a decade!

Why am I being offered an eyeQ savings plan?

The eyeQ discount plans are being offered exclusively to patients of Visionary Eye Care. The plans are an ethical, simple and helpful way to lower the cost of eye care for patients without compromising on the quality and service you deserve. It's important to remember eyeQ plans are NOT insurance.

Can I combine an eyeQ vision saving plan with my current vision plan?

YES, if Visionary Eye Care is out of network with your current vision plan then the benefits can be combined.

How do I use my out-of-network vision plan at Visionary Eye Care?

(1) We will apply your eyeQ benefits (if you enroll) at the time of your exam &/or purchase(s). (2) You will pay us directly for the products & services you purchase. (3) We will provide you with a form to submit to your current vision plan. When you send in this form along with a paid receipt to your current vision plan they will send you money directly. Unfortunately, we can't predict the amount you will receive as sums vary widely depending on your coverage details (which we do not have access to).

Is my coverage automatically renewed?

No. You will be given the option to re-enroll and/or change your plan each year.

What if I have a medical diagnosis?

If the reason for your eye exam is because of a medical problem (such as diabetes, glaucoma, dry eye disease, high risk medication use, cataracts, etc) your doctor may be required to submit your exam and any additional tests or procedures to your medical plan first. Your eyeQ exam benefit of \$130 would then be applied to any remaining balance on the eye exam fees not covered by your medical plan. Your eyeQ exam benefits DO NOT apply towards the cost of additional tests and procedures.
